## PERMIT GUIDANCE

Permit Number P526P-20-02728

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING  
PPQ HEADQUARTER OFFICIAL VIA EPERMITS.

**Wayne Wehling**

DATE

**06/08/2020**

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

- 1) This permit does not authorize movement or release into the environment of genetically engineered organisms produced with the regulated organisms described in this permit. Importation, interstate movement, and environmental release of genetically engineered plant pests require a different permit issued under regulations at 7 CFR part 340. Any unauthorized interstate movement or environmental release, including accidental release, of a regulated GE organism would be a violation of those regulations. Additional guidance and contact information for APHIS Biotechnology Regulatory Services, can be found at: <https://www.aphis.usda.gov/aphis/ourfocus/biotechnology>.
- 2) If an animal pathogen is identified in your shipment, to ensure appropriate safeguarding, please refer to [http://www.aphis.usda.gov/import\\_export/animals/animal\\_import/animal\\_imports\\_and\\_products.shtml](http://www.aphis.usda.gov/import_export/animals/animal_import/animal_imports_and_products.shtml)
- 3) If a human pathogen is identified, please refer to the CDC Etiologic Agent Import Permit Program at <http://www.cdc.gov/od/caipp/>
- 4) This permit does not fulfill the requirements of other federal or state regulatory authorities. Please contact the appropriate agencies, such as the U.S. Environmental Protection Agency, the U.S. Fish and Wildlife Service, the U.S. Food and Drug Administration, the Centers for Disease Control and Prevention, the APHIS Veterinary Services unit, the APHIS Biotechnology Regulatory Services, or your State's Department of Agriculture to ensure proper permitting.
- 5) If you are considering renewal of this permit, an application should be submitted at least 90 days prior to the expiration date of this permit to ensure continued coverage. Permits requiring containment facilities may take a longer period of time to process.

### PERMIT CONDITIONS

USDA-APHIS issues this permit to John Dailey, SkyRiver Butterflies, 18925 Natalie Court, Castro Valley, California. This permit authorizes the movement of the listed regulated materials/organisms from the above address to the Orange County Fair, 88 Fair Drive, Costa Mesa, CA (in the APHIS approved containment facility #3020).

1.
  - This permit is issued by the United States Department of Agriculture's Animal and Plant Health Inspection Service (APHIS). It conveys APHIS regulations and requirements for the material(s) listed on this permit. It does not reduce or eliminate your legal duty and responsibility to comply with all other applicable Federal and State regulatory requirements.
  - The permit number or a copy of the permit must accompany the shipment.
  - You must be an individual at least 18 years old, or legal entity such as partnership, corporation, association, or joint venture.
  - You are legally responsible for complying with all permit requirements and permit conditions.
  - If you violate any applicable laws associated with this permit, you may face substantial civil or criminal penalties. We may cancel all current permits and deny future permit applications.

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;">   <b>Wayne Wehling</b> </p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
--	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

- Without prior notice and during reasonable hours, authorized Federal and State Regulators must be allowed to inspect the conditions associated with the regulated materials/organisms authorized under this permit.

2. The permit holder must:

- maintain a valid PPQ526 permit so long as the regulated materials/organisms are alive or viable,
- not assign or transfer this permit to other persons without APHIS PPQ authorization,
- maintain an official permanent work assignment, residence, or affiliation at the address on this permit,
- notify the Pest Permit Staff as soon as possible of any change in the permit holder's work assignment, residence, or affiliation,
- notify the Pest Permit Staff of the receipt of unauthorized and/or misdirected shipments of regulated materials/organisms,
- adequately mitigate environmental impacts resulting from unauthorized release of regulated materials/organisms and notify the Pest Permit staff immediately if one occurs,
- notify the Pest Permit Staff if the facility is damaged/destroyed or if you wish to decommission the facility,
- destroy all regulated materials/organisms prior to departure from the organization unless other arrangements are confirmed by the Pest Permit Staff.

Notifications to the Pest Permit Staff must be made via 866-524-5421 or [pest.permits@usda.gov](mailto:pest.permits@usda.gov) within one business day of the event triggering a notification.

3. All persons working with the listed regulated materials/organisms must be informed of these permit conditions. Anyone working with these materials/organisms must agree to adhere to and sign/initial these conditions before beginning work. These signed conditions do not need to be submitted to USDA/APHIS but must be readily accessible and made available to Federal and State regulators upon request.

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;">   <b>Wayne Wehling</b> </p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
--	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

Note: these conditions may be copied and stored electronically for electronic signature and initialing provided that the permit number, authorized materials/organisms and life stages, release locations if applicable, and authorization statement all appear on the document with the permit number. Signing these conditions only indicates that the person working under this permit has read them; the permit holder is the sole responsible party under this permit.

4. All packages for transport must minimally consist of both inner/primary and outer/secondary packages securely sealed so that both are effective barriers to escape or unauthorized dissemination of the listed materials/organisms. The inner/primary package(s) will contain all regulated materials/organisms and must be cushioned and sealed in such a way that it remains sealed during shock, impact, and pressure changes that may occur. The outer/secondary shipping container must be rigid and strong enough to withstand typical shipping conditions (dropping, stacking, impact from other freight, etc.) without opening.
5. Standard Operating Procedures (SOPs) must be filed with, and approved by, the APHIS PPQ Pest Permit Staff at: email: pest.permits@usda.gov; phone: 866-524-5421; fax: 301-734-8700; address: 4700 River Road, Unit 133, Riverdale, MD 20737. All contact information must be kept current and the SOPs must be dated. If requirements in the permit conditions are more restrictive than the SOPs, permit conditions take precedence. APHIS PPQ must approve any changes to the SOPs before implementation.

A list of all persons with access to the containment facility must be maintained and available upon request by Federal or State Regulatory Officials.

All persons working with the regulated material/organism(s) must be trained on, and implement the permit conditions, and all APHIS approved SOPs governing the facility listed above.

6. This permit does not authorize hand carrying (baggage, personal belongings, auto, etc.). Any organisms imported by these methods will be seized and destroyed.
7. There is to be no further movement or distribution of the listed regulated materials/organisms within the United States and its territories unless the recipient holds, or is named as a responsible party on a valid PPQ526 permit for receipt of such materials/organisms.
8. Modifications to the containment facility or any changes that affect the containment of the regulated materials/organisms must be approved by APHIS prior to making changes. Please contact the Pest Permit Staff (email: pest.permits@usda.gov; phone: 866-524-5421; address: 4700 River Rd., Unit 133, Riverdale, MD 20737; Fax: 301-734-8700).
9. Following interstate movement this permit authorizes INTRASTATE TRANSPORT of pure cultures of these regulated organisms from SkyRiver Butterflies to the identified public display facility. This transport can only be in the evaluated trailer California State Registration # \_\_\_\_\_ (Permit not valid unless trailer information is filled in by permit holder).

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;"> <b>Wayne Wehling</b></p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
---	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

Species identification must be confirmed prior to shipment. Field-collected individuals and/or contaminated shipments (with soil, plant materials, etc.) may not be shipped interstate under this permit.

10. This permit and all 526 plant pest permits issued to you for regulated organisms will be suspended if you fail to uphold any of these permit conditions. For example, documentation providing evidence for any butterfly escape from containment will be grounds for immediately suspending all permits for all locations.
11. 1) The permit holder is responsible for arranging continuous staffing by trained designated representative(s) at all entry and exit doors to prevent (a) theft of specimens, (b) the unauthorized entry or exit of people and transported articles, and (c) hitch-hiking butterflies and moths (live regulated organisms perched on people, clothing, and other transported articles) from exiting the display area during all hours that the facility is held open to the public. This scheduling must provide adequate coverage during break and mealtimes. Representatives should be rotated on a schedule that ensures a high level of alertness. Butterfly nets must be kept in or near the entry and exit vestibules.

The display area of the facility must be closed to the public when responsible representatives are not available. Inspection requirements must be met for all "special" and after-close-of-business events such as parties, weddings, receptions, etc.

The permit holder must provide the necessary equipment to allow representatives to (a) conduct thorough visual examinations of people and transported articles, and (b) collect and return any found live regulated organisms.

- 2) Trained designated representatives must be (a) authorized to inspect all persons entering and exiting the facility, (b) authorized to inspect all articles transported into and through the facility, (c) authorized to prevent unauthorized entry or exit of people, (d) trained to recognize theft of live regulated organisms, and (e) trained in proper livestock handling and recovery. Transported articles include, but are not limited to, wheel chairs, strollers, backpacks, purses, jackets, coats, hats, and umbrellas.

Representatives must closely examine (visually) all people and items exposed to free-flying Lepidoptera to determine if they are infested with hitch-hiking live regulated organisms prior to allowing egress from the vestibule. Representatives must be convinced that hitch-hiking Lepidoptera are not present on people and transported articles prior to authorizing egress. This includes asking people to turn around for a full visual inspection, proper use of mirrors, and asking articles to be displayed on all sides. The permit holder is responsible for ensuring all inspections

Permit Number P526P-20-02728

THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.   <b>Wayne Wehling</b>	DATE  <b>06/08/2020</b>
--	-------------------------------

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

are conducted thoroughly and do not violate civil rights.

3) Failure to meet requirements for the inspection of people and transported articles at any time is grounds for immediate closure of the facility, revocation of this permit, and civil and criminal penalties to the fullest extent of the law.

## 12. REQUIREMENTS FOR COCOON/CHRYSLIS (PUPAE) EMERGENCE CAGE (CABINET)

In addition to the risks posed by environmental release of these Lepidoptera, the greatest risks from the movement of chrysalids/pupae are disease transmission and the parasitic Hymenoptera (small wasps) and/or Diptera (flies) that often emerge from the pupae. These parasites could impact native Lepidoptera.

To prevent the release of these parasitoids and diseases to the environment it is required that all pupae be emerged in a closed cage/cabinet that will prevent minute parasitic Hymenoptera or Diptera from escaping and will allow for their destruction. This can only be done in the containment trailer or approved containment room. If using the previously approved trailer it must be locked when not occupied by the permit holder or his designated staff.

The requirements are as follows:

Ventilation openings in the cage/cabinet must be covered with 60 mesh screen or finer (60 divisions per linear inch in each direction of wire or thread that comprises the mesh) made from materials resistant to UV light degradation (ie. metallic or polymer mesh).

The cage can be constructed of polymer materials (e.g. Acrylic, Plexiglass, Lexan) or other synthetic water-proof materials. Wood is not suitable unless coated with cleanable waterproof coatings. Cage/cabinet surfaces should be constructed of materials that can be readily cleaned/sanitized.

All surfaces must be a monochromatic light color so that parasitoids can be easily seen. There should be no hiding places for parasitoids in the material used to suspend the pupae. Parasitoids will go to the top and to the corners of the cabinet or toward a light source.

The access door must latch and seal tightly.

Interior surfaces must be visually examined for parasitoids prior to opening cages/cabinets, and if detected parasitoids should be removed. This can be done by touching the parasitoids with aspirators, tissues, paint brushes dipped in alcohol or soapy water.

The cabinet must be cleaned on a regularly scheduled basis to reduce the spread of microbial diseases. Cleaning must be done at least weekly and every other day when the cabinet is in heavy use. The cabinet must be decontaminated with 5-10 percent bleach or 70 percent alcohol at the end

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;"> <b>Wayne Wehling</b></p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
---	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

of the exhibition and prior to moving the trailer (if it is in use).

The emergence cabinet must not open directly into the exhibit area.

Any materials that enter or are placed in this emergence cabinet must comply with all sterilization (decontamination) requirements for imported regulated organisms prior to removal from the containment facility.

13. No field collected specimens may be shipped - only farm/ranch produced specimens.
14. If conflicts/differences arise between permit conditions and SOPs the more restrictive practice must prevail. When in doubt, permit conditions override SOPs. When such conflicts/differences arise you must contact the Permit Unit at [pest.permits@usda.gov](mailto:pest.permits@usda.gov), referencing your permit number, you must provide full details of the issue.
15. The containment structure used to manipulate and eclose pupae and the exhibit space for temporary display of exotic Lepidoptera will be evaluated by USDA APHIS prior to use or within a week or two after the permit is issued. For additional information please contact the Permit Unit for advisement. PPQ Headquarters, 4700 River Rd., Unit 133, Riverdale, MD 20737 Point of contact 866-524-5421 or email [pest.permits@usda.gov](mailto:pest.permits@usda.gov)
16. The temporary exhibit structure must be secure during all hours that regulated organisms are present. When the exhibit is closed to visitors and the permittee is not present the regulated organisms must be removed to a secure location or the exhibit must be secured to prevent entry by unauthorized persons. If the location is not secured (held within another building, behind a fence with locked gates, etc.) then security must be provided by the permit holder for all hours that the permit holder is not present. Details must be provided in your site specific SOPs.
17. All waste materials generated from the emergence and exhibit of these Lepidoptera must be disposed of properly. Proper disposal of dead pupae, dead butterflies, malformed adults, and waste fluids from emergence will address disease concerns.

These wastes must be immersed in a 5-10 percent hypochlorite (bleach) solution or 70 percent alcohol prior to bagging and disposal.

The emergence cage must be kept clean by wiping down with a 5-10 percent hypochlorite solution (bleach), or 70 percent alcohol, or an appropriate medical disinfectant. This cleaning/disinfecting must be done at least once each week and the disinfectant must be identified in the SOPs. Disinfection (decontamination) must be done at the close of the exhibit and prior to moving the containment trailer.

Any container (ice chest, box, cage etc.) used to transfer butterflies from the emergence containment room to the butterfly flight area must be kept clean. These materials or substrates should be cleaned at least weekly or whenever waste fluids are evident.

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;"> <b>Wayne Wehling</b></p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
---	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

18. This permit is only for public display, NOT FIELD RELEASE. Safeguards must be in place in the display facility to completely remove the possibility of release into the environment of these plant pests.
19. Reproduction of exotic Lepidoptera is not allowed in the free flight area of the exhibit except as follows: Lepidoptera may be bred in cages within the flight area, or on the premises, when the cages have been approved for specific construction materials and placement during a facility evaluation performed by a PPQ Officer, the cage(s) must seal completely, be covered with 60 mesh screen or glazing, if the cage(s) is accessible to the public it must be locked, the cage(s), the Lepidoptera involved, and the rearing protocol must be detailed in the SOPs and filed with PPQ Headquarters.
20. The covering over the containment facility must be evaluated weekly for damage of any kind. It must also be examined following any storm. Repair materials must be present at the facility. It is possible for rats to chew through stainless steel
21. Regulated organisms transported to a temporary exhibit location must be packaged to prevent escape during travel. The organisms can be transported by a bonded carrier, personal vehicle, or carried in airline baggage by the permittee. All pests shipped via a bonded carrier must be shipped in sturdy escape proof packaging.

Organisms transported by the permittee must be kept within a larger container sufficiently strong to remain intact in the event of a vehicle accident. Rigid/hard sided plastic ice chests (not Styrofoam only shell) secured with a nylon web strap are recommended for the outer most containment barrier. Pupae must be fully contained within a separate packaging within the ice chest.

22. Gift shop sales, display, storage, cannot be conducted within the containment rooms for the free flight of the butterflies, laboratory room for pupae emergence, or the entry and/or exit vestibule associated with these containment rooms.
23. Every January through the duration of this permit, the applicant must submit an inventory for the previous year of the number of each species received from each source. The condition (e.g., healthy, diseased, parasitized, etc.) of pupae received must also be listed. Submit to: APHIS PPQ Pest Permit Staff at: email: pest.permits@usda.gov; phone: 866-524-54214700; fax: 301-734-8700; address: River Road, Unit 133, Riverdale, MD 20737. Provide permit number and permit holder's name in the subject line.
24. Dead fully formed adult specimens can be used for study, exhibit, redistribution, if frozen for 72 hours prior to use.
25. REQUIREMENTS FOR CLOSING DOWN THE EXHIBIT

At the close of the exhibit, all plants and Lepidoptera must be disposed of properly. Lepidoptera can be returned to the supplier. If you want to distribute remaining Lepidoptera livestock to anyone else contact the APHIS PPQ Permit unit for guidance. Permission can be provided to ship to

Permit Number P526P-20-02728

<p>THIS PERMIT HAS BEEN APPROVED ELECTRONICALLY BY THE FOLLOWING PPQ HEADQUARTER OFFICIAL VIA EPERMITS.</p> <p style="text-align: center;">   <b>Wayne Wehling</b> </p>	<p>DATE</p> <p style="text-align: center;"><b>06/08/2020</b></p>
--	--

WARNING: Any alteration, forgery or unauthorized use of this Federal Form is subject to civil penalties of up to \$250,000 (7 U.S.C.s 7734(b)) or punishable by a fine of not more than \$10,000, or imprisonment of not more than 5 years, or both (18 U.S.C.s 1001)

another permitted butterfly exhibit. Otherwise, Lepidoptera must be frozen for 72 hours prior to disposal.

Plant materials exposed to the regulated organisms must be destroyed unless they can be kept/held in the exhibit containment area for 3 weeks following the last Lepidopteran flown. If plant materials (including pots and soil) need to be removed from the exhibit sooner than 3 weeks after the last Lepidopteran has flown then everything must be placed in plastic bags, securely closed while in containment then frozen or incinerated immediately upon leaving containment. Arrangements can be made to treat everything with insecticide prior to removal from the containment enclosure. If this is the desired option then the insecticide must be approved by the State Department of Agriculture to kill ova, larva, pupae and adult Lepidoptera. If the plants can be held in the exhibit flight area for 3 weeks then the plants, soil surface, and pots must be carefully inspected for eggs, caterpillars, and pupae prior to removing from the evaluated containment facility. All State requirements for the plant material must be followed closely.

26. Both sexes of Saturniid moths (silk moths) (Saturniidae) cannot fly free in a walkthrough exhibit space. Only one sex can fly free in the exhibit at any given time (the other sex can be caged in an approved exhibit space). Females must not be mated if flying free. These species oviposit without chemical stimulation from host plants and they generally feed on a broad range of hosts.
27. For swallowtail butterflies in the genus Papilio only males can fly free in the exhibit space. Females must be separately caged or not exhibited.

### END OF PERMIT CONDITIONS
